(12) DESCRIPTIONS OF INVENTION To the patent of Russian Federation**(21)** Application number registered: **2001103479/09****(22)** Application filing date: **2001.02.05****(24)** Date started of validity of the patent: **2001.02.05****(45)** Date: **2002.10.27****(71)** Applicant information: **Garmonov Aleksandr Vasil'evich****(72)** Inventor information: **Garmonov A.V.; Karpitskij Ju.E.; Savinkov A.Ju.****(73)** Grantee (assignee) information:
Garmonov Aleksandr Vasil'evichMail address: **394077, g.Voronezh,
Moskovskij pr-t, 97, ZAO "Kodofon",
V.A.Fursovoj****(54) METHOD FOR COHERENT STAGGERED SIGNAL TRANSMISSION**

FIELD: radio engineering; radio communication systems. SUBSTANCE: method includes generation of N staggering channels and N pilot signals on sending end; data signal is transmitted through all staggering channels and pilot signal is passed through respective staggering channels; on receiving end transfer functions of staggering channels are estimated using transmitted pilot signals; using estimates obtained data signal transmitted through each staggering channel is pre-distorted on sending end. EFFECT: enhanced efficiency of signal transmission at frequency-selective signal fading. 7 cl, 6 dwg
